

Schedule and connect to events with a click of the mouse.
User-Event integration in one online location.

Dynamic Event Calendar

Offering complete interactivity, embedded links and complete integration with your other iBoomerang products, the iBoomerang Dynamic Event Calendar is far from your run-of-the-mill scheduling calendar.

With the Dynamic Event Calendar, you can schedule and list online events, such as training activities or web conferences, and include links allowing your clients/employees access to the web event, eliminating the need to send out annoying e-mail reminders.

Keeping your employees/clients up to date with full event listings and connectivity in one location has never been so easy. Ensuring timeliness and efficiency, your Dynamic Event Calendar will act like a TV-Guide for your business, adding support to the online infrastructure your business needs to thrive.
